Investing in Hedge Funds Joseph G. Nicholas,2010-05-20 Hedge funds are in the news and on the minds of sophisticated investors more than ever. Investors have questions about how the funds are structured, where the assets are allocated, and whether hedge funds can truly act as a hedge against market risk. The answers are all here in *Investing in Hedge Funds*. Until recently, much of what makes hedge funds tick has been closely guarded--the intellectual property of Wall Street's investment elite. In this updated and revised text, Joseph G. Nicholas, founder and chairman of the leading industry information provider Hedge Fund Research, Inc., travels inside the hedge fund marketplace to explain the alternative investment strategies of top fund managers, providing clear descriptions of how to access these funds and where they're headed. It's a complete guide that everyone investing in hedge funds should study closely.

Towards a Maqāṣid al-Sharī'ah Index of Socio-Economic Development Salman Syed Ali,2019-09-05 Islamic economics, which is a discipline for studying economic behaviour from an Islamic perspective, advocates comprehensive human development defined by advancement and progress in multiple dimensions beyond GDP, income, or standard of living. Not only should socio-economic progress be in all dimensions but it should also have a higher purpose. A society is considered economically and socially developed if adequate protections are provided for faith, life, intellect, progeny, and wealth. This concept of balanced progress itself is an important idea recognized by the sociologists. However, the same has so far not been measured or used in policy making by economists. Similarly, lack of adequate protections in a society along these dimensions indicates poverty which is another way of measuring slack in development. The chapters in this edited volume deal with conceptualization of socio-economic development on these lines, and show how to measure socio-economic development in a comprehensive way. The book will be of interest to academics in the fields of economics, economic development, and Islamic economics. It will also be of interest to policy makers engaged in economic development, social progress, and poverty alleviation.

Knowledge Alchemy Tero Erkkilä, Meng-Hsuan Chou, Niilo Kauppi, 2023-05-31 This book introduces the concept of 'knowledge alchemy' to capture the generic process of transforming mundane practices and policies of governance into competitive ones following imagined global gold standards. Using examples from North America, Europe and Asia, it explores how knowledge alchemy increasingly informs national and institutional policies and practices on economic performance, higher education, research and innovation. The book examines how governments around the world have embraced global

models of world-class university, human capital and talent competition as essential in ensuring national competitiveness. Through its analysis, the book shows how this strongly future-oriented and anticipatory knowledge governance is steered by a surge of global classifications, rankings and indicators, resulting in numerous comparisons of various domains that today form more constraining global policy scripts.
